Coollest CD Case EVER! Has built-in Theremin

August 31, 2009

From [synthgear](#): “Moldover’s new CD, over 3 years in the making, not only delivers gorgeously diverse music with meaning and musical mastery, it completely redefines what it means to “play an album”. . .Moldover’s CD packaging itself IS a new musical instrument! The CD is mounted on a custom designed circuit board, intricately patterned and powering a ‘light-Theremin.’ Yes! You play the artwork and it makes sound! Only the musical supervillain genius of Moldover could develop something so stunningly innovative.”

Moldover's Album - Circuit Board Instrument
